

I write in FAVOR of the XM & Sirius merger. Presently, I have XM in my house and in my car. My wife's car only has Sirius. We have no option but to buy dual accounts at twice the cost. Furthermore, the split sports (one has football, one hockey, one basketball, etc.) is a major inconvenience. As a big sports fan, I find myself choosing the car that I wish to drive based upon what games I want to listen to that day. A merger makes sense in so many ways - reduce cost, harmonize the programming, stop the crazy spending to attract talent, etc. I fear that without this merger the future of this great technology could be in peril. Make the right choice and SUPPORT the merger. Thank you – Joseph A. Wortman
